#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, filed 1/20/11, with respect to the rejection(s) of claim(s) 20-22 under 35 USC 112 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of newly found prior art.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 20-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Dorricott et al. (US Pat. No. 5,353,119).

4. Consider claim 21. Dorricott et al. teaches an apparatus for decompressing stored and compressed digital video information having a frame rate corresponding to 24 frames per second, wherein the compressed digital video information was generated by eliminating substantially redundant consecutive images in uncompressed digital video information originating from a video signal having a frame rate of 29.97 frames per second, wherein the compressed digital video information has associated

Art Unit: 2484

information, stored therewith, indicating where the substantially redundant consecutive images were located in the uncompressed digital video information, the apparatus comprising: means for receiving from storage the associated information indicating where the substantially redundant consecutive images were located in the uncompressed digital video information; means for retrieving the compressed digital video information to provide corresponding video fields at a frame rate of 24 frames per second; means for processing the video fields to introduce redundant images according to the received information; and means for controlling a speed of playback of the processed video fields to provide a video signal having a frame rate of 29.97 (col. 47, lines 44-57; fig. 55A).

5. Claims 20 and 22 are rejected using similar reasoning as the corresponding claim above.
